

Welcome! Waiting for Workshop to start.

R for Economics Workshop Day 2: Friday Jan 14, **9am** - 4pm CT

Things to do while you wait:

- Start up RStudio following instructions on u.tamu.edu/R4Econ
- Respond to poll “Are you having technical difficulties...?”
- If you need technical assistance, join the breakout room.

R for Economics

Wesley Brashear
14 January 2022

Day 2 - Friday, January 14th, 9:00-4:00

1. Starting RStudio
2. Warm-up Review
3. Matrices
4. Data Frames
5. Data visualization in R
6. User-created functions
7. Working with R markdown

Data Frames

Zhenhua He
14 January 2022

DataFrame

- Primary R data structure
- Two-dimensional size-mutable
- Heterogeneous tabular data structure

	C1	C2	C3	C4
A	0	x	0.1	True
B	1	y	2.4	False
C	2	z	1.9	True
D	2	w	8.3	False
E	9	a	6.8	False

DataFrame Example

house sale data

A	B	C	D	E	F	G	H
id	date	price	bedrooms	bathrooms	sqft_living	sqft_lot	floors
7129300520	20141013T00	221900	3	1	1180	5650	1
6414100192	20141209T00	538000	3	2.25	2570	7242	2
5631500400	20150225T00	180000	2	1	770	10000	1
2487200875	20141209T00	604000	4	3	1960	5000	1
1954400510	20150218T00	510000	3	2	1680	8080	1
7237550310	20140512T00	1.23E+06	4	4.5	5420	101930	1
1321400060	20140627T00	257500	3	2.25	1715	6819	2
2008000270	20150115T00	291850	3	1.5	1060	9711	1
2414600126	20150415T00	229500	3	1	1780	7470	1

Creating a Data Frame

Ways to do so:

- from matrix
- from vectors
- Read file (`read.csv`, `read.table`, ...)

Break until 1 PM CST

Working with R Markdown

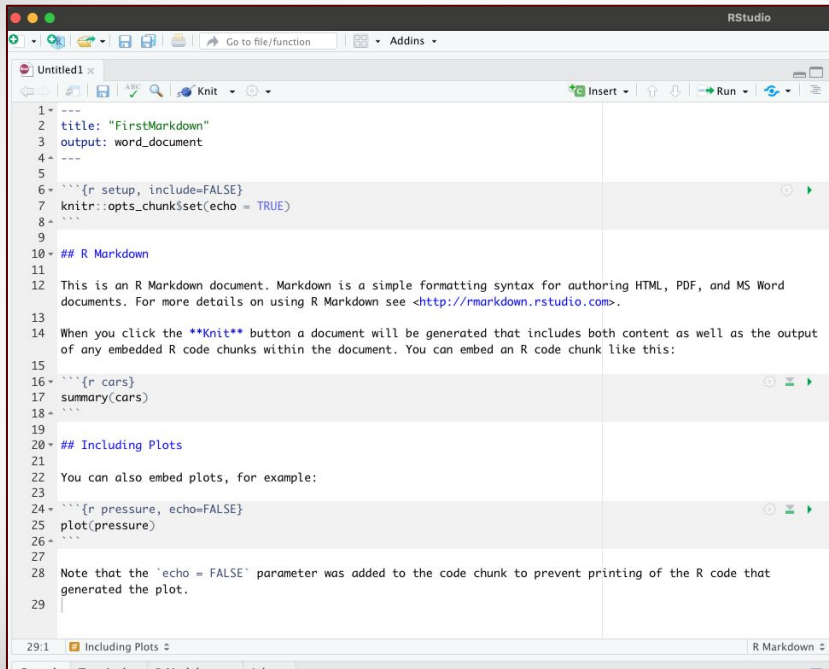

Wesley Brashear
14 January 2022

R Markdown

- Allows users to create reports for data analyzed in R
- Connects data to report = reproducibility
- Supports a variety of outputs:
 - HTML
 - PDF
 - MS word
 - Shiny applications
- Can use multiple languages including R, Python, and SQL

R Markdown

```
1 ---
2 title: "FirstMarkdown"
3 output: word_document
4 ---
5
6 ```{r setup, include=FALSE}
7 knitr::opts_chunk$set(echo = TRUE)
8 ```
9
10 ## R Markdown
11
12 This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word
13 documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.
14
15 When you click the Knit button a document will be generated that includes both content as well as the output
16 of any embedded R code chunks within the document. You can embed an R code chunk like this:
17
18 ```{r cars}
19 summary(cars)
20 ```
21
22 ## Including Plots
23
24 You can also embed plots, for example:
25
26 ```{r pressure, echo=FALSE}
27 plot(pressure)
28 ```
29
30 Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that
31 generated the plot.
```

FirstMarkdown

R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
```

```
##      speed      dist
## Min.   : 4.0    Min.   : 2.00
## 1st Qu.:12.0    1st Qu.: 26.00
## Median :15.0    Median : 36.00
## Mean   :15.4    Mean   : 42.98
## 3rd Qu.:19.0    3rd Qu.: 56.00
## Max.   :25.0    Max.   :120.00
```

Including Plots

You can also embed plots, for example:

R Markdown

1. Click down arrow

2. Select R Markdown

Name	Description	Version

10 ## R Markdown  
11  
12 This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word  
13 documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.  
14  
15 When you click the Knit button a document will be generated that includes both content as well as the output  
16 of any embedded R code chunks within the document. You can embed an R code chunk like this:  
17  
18 ```{r cars}  
19 summary(cars)  
20 ```  
21  
22 ## Including Plots  
23  
24 You can also embed plots, for example:  
25  
26 ```{r pressure, echo=FALSE}  
27 plot(pressure)  
28 ```  
29  
30 Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that  
31 generated the plot.
```

YAML header:

- Generated automatically
- Opens and closes with ‘ - - - ’
- Includes title, output format, can also include author and date

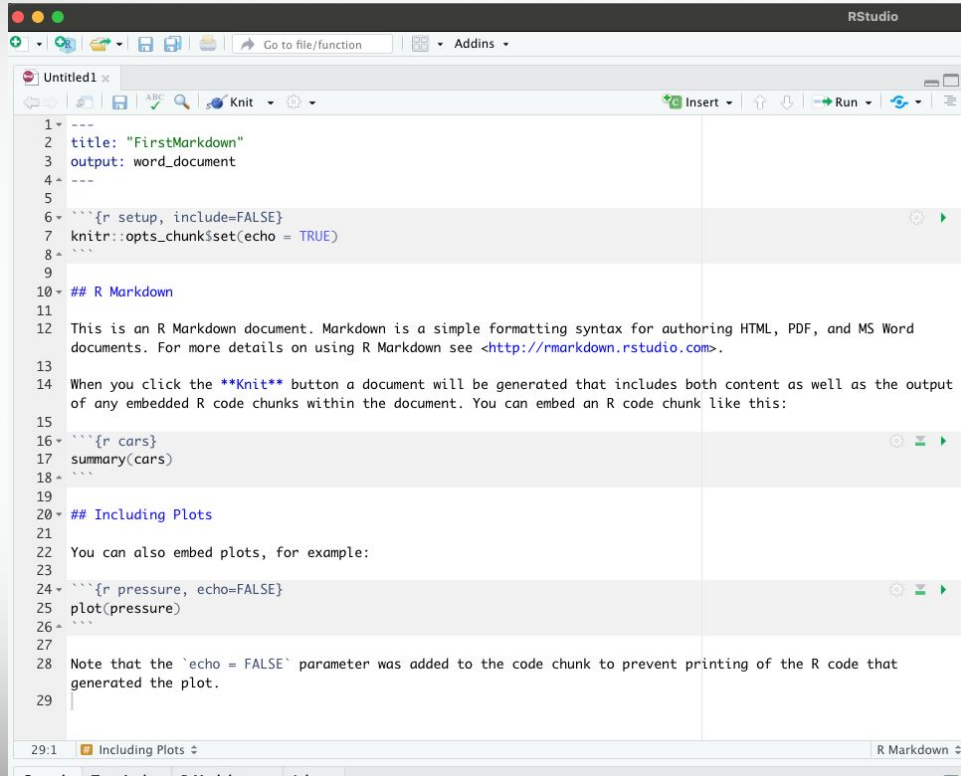

R Markdown

```
1 ---
2 title: "FirstMarkdown"
3 output: word_document
4 ---
5
6 ```{r setup, include=FALSE}
7 knitr::opts_chunk$set(echo = TRUE)
8 ```
9
10 ## R Markdown
11
12 This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word
13 documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.
14
15 When you click the Knit button a document will be generated that includes both content as well as the output
16 of any embedded R code chunks within the document. You can embed an R code chunk like this:
17
18 ```{r cars}
19 summary(cars)
20 ```
21
22 ## Including Plots
23
24 You can also embed plots, for example:
25
26 ```{r pressure, echo=FALSE}
27 plot(pressure)
28 ```
29
30 Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that
31 generated the plot.
```

This section is used to set up global options - can be overwritten in individual code chunk headers

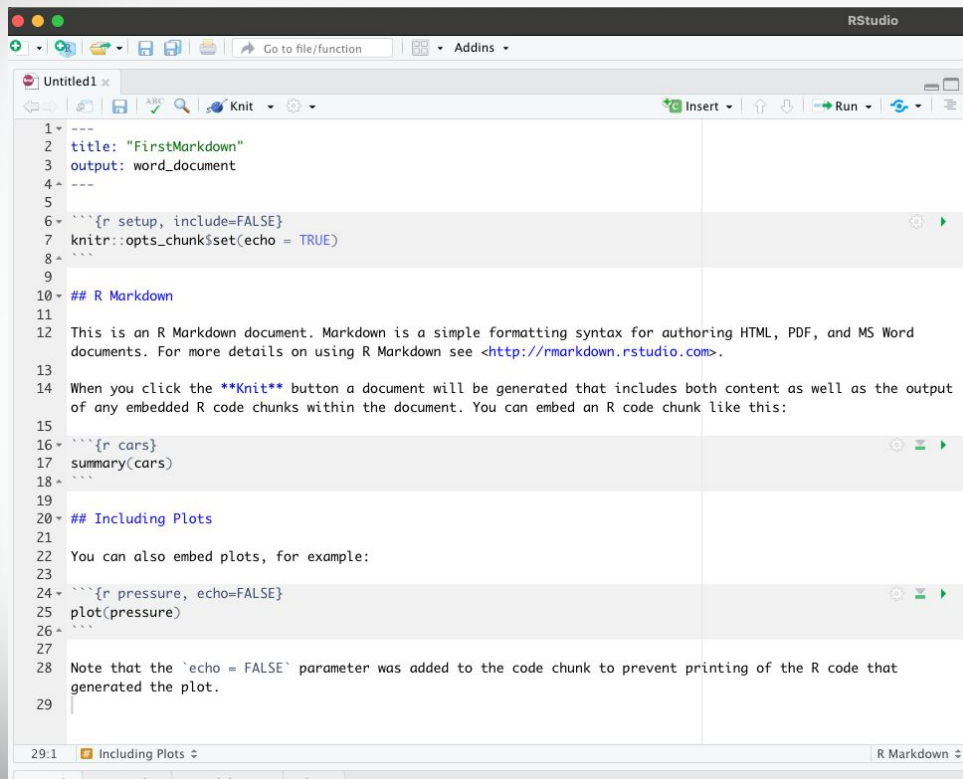

R Markdown

```
1 ---
2 title: "FirstMarkdown"
3 output: word_document
4 ---
5
6 ```{r setup, include=FALSE}
7 knitr::opts_chunk$set(echo = TRUE)
8 ```
9
10 ## R Markdown
11
12 This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word
13 documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.
14
15 When you click the Knit button a document will be generated that includes both content as well as the output
16 of any embedded R code chunks within the document. You can embed an R code chunk like this:
17
18 ```{r cars}
19 summary(cars)
20 ```
21
22 ## Including Plots
23
24 You can also embed plots, for example:
25
26 ```{r pressure, echo=FALSE}
27 plot(pressure)
28 ```
29
30 Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that
31 generated the plot.
```

This text will be included in the report.

R Markdown

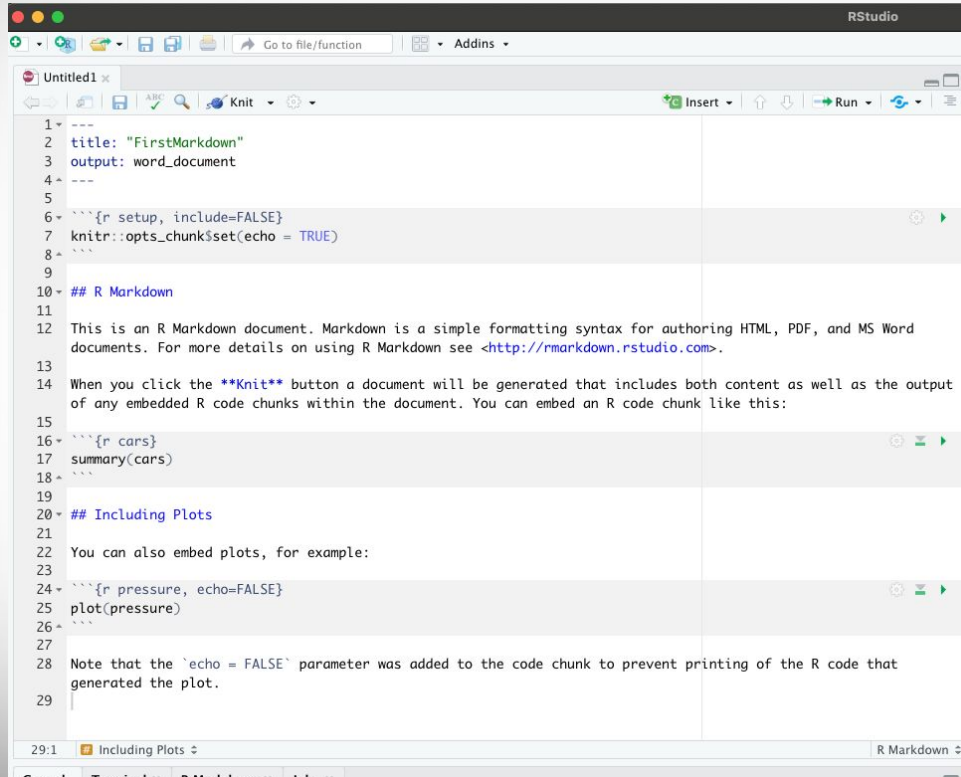

```
1 ---
2 title: "FirstMarkdown"
3 output: word_document
4 ---
5
6 ```{r setup, include=FALSE}
7 knitr::opts_chunk$set(echo = TRUE)
8 ```
9
10 ## R Markdown
11
12 This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word
13 documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.
14
15 When you click the Knit button a document will be generated that includes both content as well as the output
16 of any embedded R code chunks within the document. You can embed an R code chunk like this:
17
18 ```{r cars}
19 summary(cars)
20 ```
21
22 ## Including Plots
23
24 You can also embed plots, for example:
25
26 ```{r pressure, echo=FALSE}
27 plot(pressure)
28 ```
29
30 Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that
31 generated the plot.
```

First code chunk.

- Code chunk opens and closes with 3 backticks.
- Curly brackets include r (denoting the language) and the name of the code chunk
- echo = TRUE inherited from code chunk - code will be shown in report

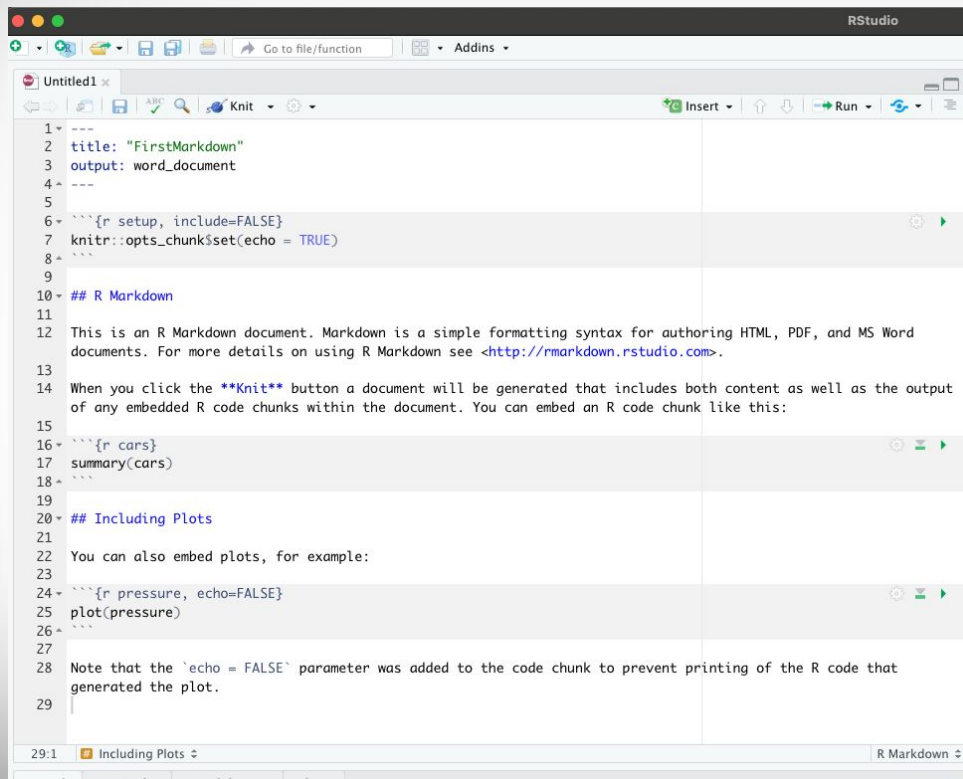

R Markdown

```
1 ---
2 title: "FirstMarkdown"
3 output: word_document
4 ---
5
6 ```{r setup, include=FALSE}
7 knitr::opts_chunk$set(echo = TRUE)
8 ```
9
10 ## R Markdown
11
12 This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word
13 documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.
14
15 When you click the Knit button a document will be generated that includes both content as well as the output
16 of any embedded R code chunks within the document. You can embed an R code chunk like this:
17
18 ```{r cars}
19 summary(cars)
20 ```
21
22 ## Including Plots
23
24 You can also embed plots, for example:
25
26 ```{r pressure, echo=FALSE}
27 plot(pressure)
28 ```
29
30 Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that
31 generated the plot.
```

This text will be included in the report.

R Markdown

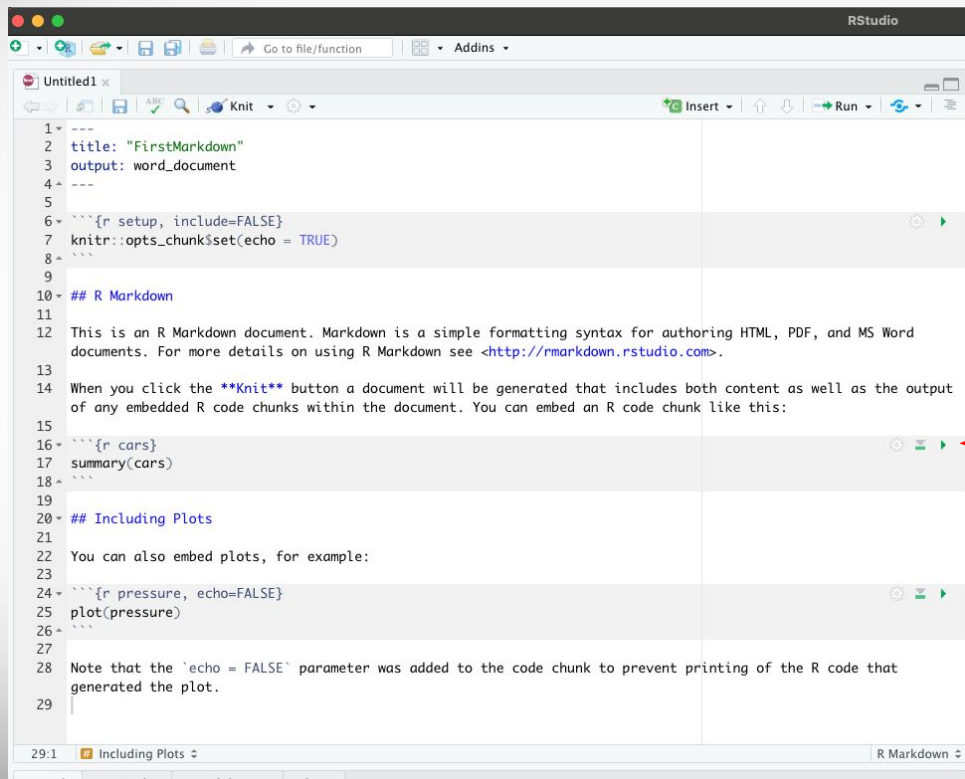

```
1 ---
2 title: "FirstMarkdown"
3 output: word_document
4 ---
5
6 ```{r setup, include=FALSE}
7 knitr::opts_chunk$set(echo = TRUE)
8 ```
9
10 ## R Markdown
11
12 This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word
13 documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.
14
15 When you click the Knit button a document will be generated that includes both content as well as the output
16 of any embedded R code chunks within the document. You can embed an R code chunk like this:
17
18 ```{r cars}
19 summary(cars)
20 ```
21
22 ## Including Plots
23
24 You can also embed plots, for example:
25
26 ```{r pressure, echo=FALSE}
27 plot(pressure)
28 ```
29
30 Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that
31 generated the plot.
```

Second code chunk

- Creates a plot
- echo = FALSE - plot will be in report, but code will not

R Markdown

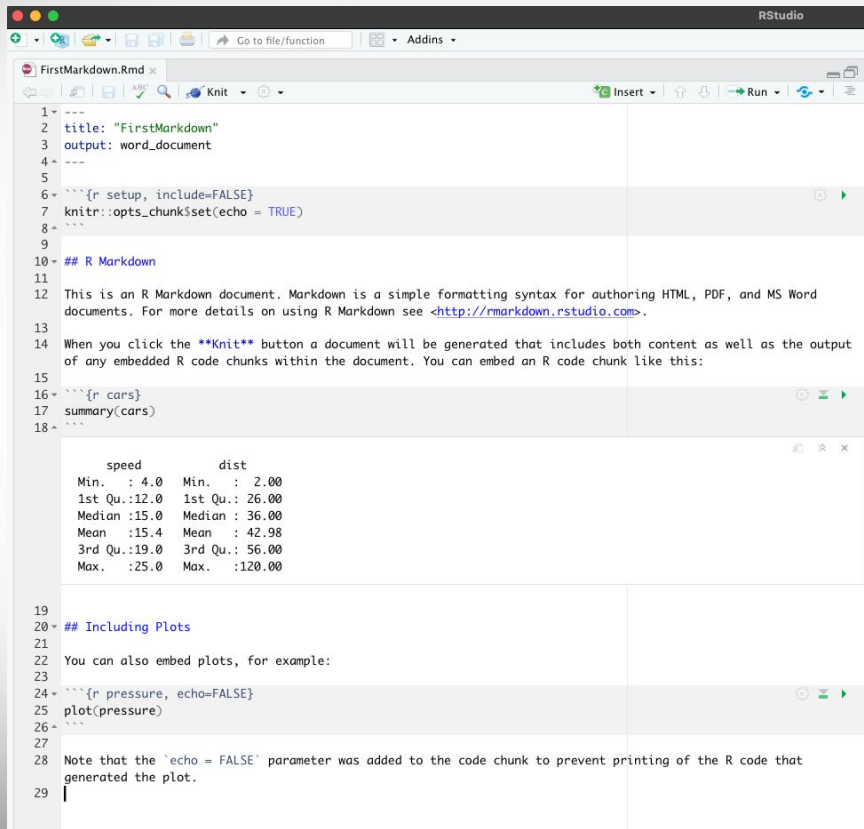

The screenshot shows the RStudio interface with an R Markdown document open. The document content is as follows:

```
1 ---  
2 title: "FirstMarkdown"  
3 output: word_document  
4 ---  
5  
6 ```{r setup, include=FALSE}  
7 knitr::opts_chunk$set(echo = TRUE)  
8 ```  
9  
10 ## R Markdown  
11  
12 This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word  
13 documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.  
14  
15 When you click the **Knit** button a document will be generated that includes both content as well as the output  
16 of any embedded R code chunks within the document. You can embed an R code chunk like this:  
17  
18 ```{r cars}  
19 summary(cars)  
20 ```  
21  
22 ## Including Plots  
23  
24 You can also embed plots, for example:  
25  
26 ```{r pressure, echo=FALSE}  
27 plot(pressure)  
28 ```  
29  
30 Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that  
31 generated the plot.
```

A red arrow points to the green run icon (a play button) located at the end of the second code chunk (lines 16-18). This icon is used to execute individual R code chunks within the document.

This icon allows you to run individual code chunks.

## R Markdown Cheat Sheet

learn more at [rmarkdown.rstudio.com](http://rmarkdown.rstudio.com)

rmarkdown 0.2.50 Updated: 8/14

**1. Workflow** R Markdown is a format for writing reproducible, dynamic reports with R. Use it to embed R code and results into slideshows, pdfs, html documents, Word files and more. To make a report:

i. **Open** - Open a file that uses the .Rmd extension.

ii. **Write** - Write content with the easy to use R Markdown syntax

iii. **Embed** - Embed R code that creates output to include in the report

iv. **Render** - Replace R code with its output and transform the report into a slideshow, pdf, html or ms Word file.

**2. Open File** Start by saving a text file with the extension .Rmd, or open an RStudio Rmd template

- In the menu bar, click **File > New File > R Markdown...**
- A window will open. Select the class of output you would like to make with your .Rmd file
- Select the specific type of output to make with the radio buttons (you can change this later)
- Click OK

**3. Markdown** Next, write your report in plain text. Use markdown syntax to describe how to format text in the final report.

**syntax**

Plain text  
End a line with two spaces to start a new paragraph.  
+italics+ and +stalic+  
+bold+ and +bold+  
superscript+^+  
+strikeThrough+  
[link](www.rstudio.com)

= sub-item 2

Table Header | Second Header

Table Cell | Cell 2

Cell 3 | Cell 4

**4. Choose Output** Write a YAML header that explains what type of document to build from your R Markdown file.

**YAML**

A YAML header is a set of key: value pairs at the start of your file. Begin and end the header with a line of three dashes (---)

```

title: "beetle"
author: "dave"
output: html_document

This is the start of my report. The above is metadata saved in a YAML header.
```

The RStudio template writes the YAML header for you

The output value determines which type of file R will build from your .Rmd file (in Step 6)

output: html\_document ..... html file (web page)

output: pdf\_document ..... pdf document

output: word\_document ..... Microsoft Word .docx

output: beamer\_presentation ..... beamer slideshow (pdf)

output: ioslides\_presentation ..... ioslides slideshow (html)

# R Markdown Cheat Sheet:

<https://www.rstudio.com/wp-content/uploads/2015/02/rmarkdown-cheatsheet.pdf>

**5. Embed Code** Use knitr syntax to embed R code into your report. R will run the code and include the results when you render your report.

### inline code

Surround code with back ticks and `r`. R replaces inline code with its results.

Two plus two equals 4. `r` `2 + 2` Two plus two equals 4.

### code chunks

Start a chunk with ````r`. End a chunk with `````.

Here's some code `dim(iris)` Here's some code `dim(iris)` `## [1] 150 5`

### display options

Use knitr options to style the output of a chunk. Place options in brackets above the chunk.

Here's some code `{r eval=FALSE}` `dim(iris)` Here's some code `dim(iris)` Here's some code `{r echo=FALSE}` `dim(iris)` Here's some code `## [1] 150 5`

| option                  | default  | effect                                                    |
|-------------------------|----------|-----------------------------------------------------------|
| <code>eval</code>       | TRUE     | Whether to evaluate the code and include its results      |
| <code>echo</code>       | TRUE     | Whether to display code along with its results            |
| <code>warning</code>    | TRUE     | Whether to display warnings                               |
| <code>error</code>      | FALSE    | Whether to display errors                                 |
| <code>message</code>    | TRUE     | Whether to display messages                               |
| <code>tidy</code>       | FALSE    | Whether to reformat code in a tidy way when displaying it |
| <code>results</code>    | "markup" | "markup", "asis", "hold", or "hide"                       |
| <code>cache</code>      | FALSE    | Whether to cache results for future renders               |
| <code>comment</code>    | "##"     | Comment character to preface results with                 |
| <code>fig.width</code>  | 7        | Width in inches for plots created in chunk                |
| <code>fig.height</code> | 7        | Height in inches for plots created in chunk               |

For more details visit [yihui.name/knitr/](http://yihui.name/knitr/)

**6. Render** Use your .Rmd file as a blueprint to build a finished report.

Render your report in one of two ways

1. Run `rmarkdown::render("<file path>")`
2. Click the **knit HTML** button at the top of the RStudio scripts pane

When you render, R will

- execute each embedded code chunk and insert the results into your report
- build a new version of your report in the output file type
- open a preview of the output file in the viewer pane
- save the output file in your working directory

**7. Interactive Docs** Turn your report into an interactive Shiny document in 3 steps

**1** Add runtime: shiny to the YAML header

```

title: "Line graph"
output: html_document
runtime: shiny

```

**2** In the code chunks, add Shiny input functions to embed widgets. Add Shiny render functions to embed reactive output

```
Choose a time series:
selectInput("date", "",
 c("2002", "2003"))

See a plot:
{r echo = FALSE}
renderPlot({
 d = getInputs$date
 plot(d)
})
```

**3** Render with `rmarkdown::run` or click Run Document in RStudio

\* Note: your report will be a Shiny app, which means you must choose an html output format, like `html_document` (for an interactive report) or `ioslides_presentation` (for an interactive slideshow).

**8. Publish** Share your report where users can visit it online

### Rpubs.com

Share non-interactive documents on RStudio's free R Markdown publishing site [www.rpubs.com](http://www.rpubs.com)

### ShinyApps.io

Host an interactive document on RStudio's server. Free and paid options [www.shinyapps.io](http://www.shinyapps.io)

Click the "Publish" button in the RStudio preview window to publish to `rpubs.com` with one click.

# R for Economics Day 2 - Workshop Close

Thank you for attending the workshop!

Resources for the workshop are available at

<https://hprc.tamu.edu/events/workshops/2022-01-11-REcon.html>

For any questions please email [help@hprc.tamu.edu](mailto:help@hprc.tamu.edu) with “R for Economics” in the subject line

For help with technical issues with R you can register for a “Bring Your Own Code” session here:
